

**NAME**

create\_xref – create cross reference

**SYNOPSIS**

```
#include <ShoreApp.h>
shrc Ref<T>::create_xref(const char *path, mode_t mode) const;
```

**DESCRIPTION**

**Create\_xref** creates a cross reference named by *path*, and containing a pointer to the given object. The mode of the cross reference object is given by *mode*. See **umask(oc)** for a description of how the *mode* parameter is used to determine the actual mode bits.

**VERSION**

This manual page applies to Version 1.1 of the Shore software.

**SPONSORSHIP**

The Shore project is sponsored by the Advanced Research Project Agency, ARPA order number 018 (formerly 8230), monitored by the U.S. Army Research Laboratory under contract DAAB07-91-C-Q518.
